

We claim:

1. A wiping product comprising a non-woven fibrous sheet having a dry sheet bulk of 2 cubic centimeters or greater per gram, said sheet containing a deliquescent material and having an equilibrium moisture content of 10 dry weight percent or

5 greater.

2. The product of claim 1 wherein the non-woven fibrous sheet comprises cellulose papermaking fibers.

10 3. The product of claim 1 wherein the non-woven fibrous sheet comprises synthetic fibers.

4. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 2 to about 150 weight percent based on dry fiber.

15

5. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 2 to about 125 weight percent based on dry fiber.

20 6. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 3 to about 125 weight percent based on dry fiber.

7. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 5 to about 100 weight percent based on dry fiber.

25

8. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 5 to about 75 weight percent based on dry fiber.

9. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 5 to about 50 weight percent based on dry fiber.

30

10. The product of claim 1 wherein the amount of the deliquescent material in the sheet is from about 10 to about 50 weight percent based on dry fiber.

35

11. The product of claim 1 wherein the equilibrium moisture content of the sheet is about 30 weight percent or greater based on dry fiber.

12. The product of claim 1 wherein the equilibrium moisture content of the sheet is about 60 weight percent or greater based on dry fiber.

5 13. The product of claim 1 wherein the equilibrium moisture content of the sheet is about 100 weight percent or greater based on dry fiber.

14. The product of claim 1 wherein the equilibrium moisture content of the sheet is from about 30 to about 120 weight percent based on dry fiber.

10 15. The product of claim 1 wherein the equilibrium moisture content of the sheet is from about 50 to about 100 weight percent based on dry fiber.

16. The product of claim 1 wherein the equilibrium moisture content of the sheet is from about 10 to about 50 weight percent based on dry fiber.

15 17. The product of claim 1 wherein the equilibrium moisture content of the sheet is from about 15 to about 50 weight percent based on dry fiber.

18. The product of claim 1 wherein the equilibrium moisture content of the sheet is from about 20 to about 50 weight percent based on dry fiber.

20 19. The product of claim 1 wherein the deliquescent material is a salt selected from the group consisting of aluminates, calcium chloride, lithium chloride, sodium acetate, potassium acetate, ammonium acetate and trimethylamine n-oxide.

25 20. The product of claim 1 wherein the deliquescent material is lithium chloride.

21. The product of claim 1 wherein the deliquescent material is calcium chloride.

30 22. The product of claim 1 wherein said product is a facial tissue.

23. The product of claim 1 wherein said product is a bath tissue.

24. The product of claim 1 wherein said product is a paper towel.

35 25. The product of claim 1 wherein said product is a wet wipe.

26. The product of claim 1 wherein said product is a wet wipe containing a water-dispersible binder.
- 5 27. The product of claim 1 wherein said product is water-dispersible.
